In the previous lectures, we installed MySQL & Postgresql.

Here are summaries of **common tasks** you might want to perform at some point:

- Stop a running MySQL server:
  - MySQL: Windows | macOS | Linux
  - Postgresql: Windows | macOS | Linux
- Start a MySQL server:
  - MySQL: Windows | macOS | Linux
  - Postgresql: Windows | macOS | Linux
- Update Postgresql to a newer version:
  - MySQL: Windows | macOS | Linux
  - Postgresql: Windows | macOS | Linux
- Uninstall MySQL:
  - MySQL: Windows | macOS | Linux
  - Postgresql: Windows | macOS | Linux
- Reset the root user password:
  - MySQL: Windows | macOS | Linux
  - Postgresql: Windows | macOS | Linux
- Switch to the legacy password flow (MySQL only): Windows | macOS | Linux

Also have a look at the **official documentation pages** for full details:

- MySQL Official Documentation: https://dev.mysql.com/doc/
- Postgresql Official Documentation: https://www.postgresql.org/docs/
